USA TODAY/GALLUP POLL

MAY WAVE 1

-- FINAL TOPLINE --

Results are based on telephone interviews conducted May 12-15, 2011 with a random sample of –1,024—adults, aged 18+, living in all 50 U.S. states and the District of Columbia.

For results based on the total sample of national adults, one can say with 95% confidence that the margin of error is ±4 percentage points.

For results based on the sample of –897— registered voters, the maximum margin of sampling error is ±4 percentage points.

For results based on the sample of –484— adults employed full- or part-time, the maximum margin of sampling error is ±5 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking.   Each sample includes a minimum quota of 400 cell phone respondents and 600 landline respondents, with additional minimum quotas among landline respondents for gender within region. Landline numbers are chosen at random among listed telephone numbers, cell phone numbers are selected using random-digit dial methods. Landline respondents are chosen at random within each household on the basis of which member had the most recent birthday.

Samples are weighted by gender, age, race, Hispanic ethnicity, education, region, adults in the household, and phone status (cell phone only/landline only/both, having an unlisted landline number, and being cell phone mostly). Demographic weighting targets are based on the March 2010 Current Population Survey figures for the age 18+ non-institutionalized population living in U.S. telephone households.   All reported margins of sampling error include the computed design effects for weighting and sample design.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls.

21. Suppose gasoline prices continue to rise. How high do you think gas prices would have to rise before you would – [RANDOM ORDER] -- or is that something you would not do no matter how high gas prices get? *[OPEN-ENDED]*

A. Move from your current home so you would be closer to the places you drive to most often

	Less than $6.00	$6.00-$7.99	$8.00-$10.00	More than $10.00	Would not do no matter price	No opinion
2011 May 12-15	11	5	6	3	69	6

B. Use mass transit, such as a bus or subway, as your main source of transportation

	Less than $6.00	$6.00-$7.99	$8.00-$10.00	More than $10.00	Would not do no matter price	No opinion
2011 May 12-15	19	7	5	2	52	14

C. Replace your vehicle with one that gets significantly better gas mileage

	Less than $6.00	$6.00-$7.99	$8.00-$10.00	More than $10.00	Would not do no matter price	No opinion
2011 May 12-15	32	13	5	2	38	10

D. *(Asked of those employed full- or part-time)* **Change jobs or quit working**

BASED ON –484—ADULTS EMPLOYED FULL- OR PART-TIME

	Less than $6.00	$6.00-$7.99	$8.00-$10.00	More than $10.00	Would not do no matter price	No opinion
2011 May 12-15	10	11	3	1	72	3

E. Buy an electric car that you could only drive for a limited number of miles at one time

	Less than $6.00	$6.00-$7.99	$8.00-$10.00	More than $10.00	Would not do no matter price	No opinion
2011 May 12-15	12	10	9	3	57	9
